

Originating from the warmer waters around the world these fish are some of the most spectacular in terms of size, speed and power.

Highly prized for their firm meaty flesh they are regarded as an excellent alternative to most prime fish.

The products listed in this section are only a small selection of those available so please contact your local depot for detailed stock information.

Game Fish

Yellowtail Kingfish

Tuna

Tuna with its firm, rich red meat has become increasingly popular in the UK due to its versatility. Although available throughout the year, during the summer supply can be interrupted due to the monsoons around the Pacific.

Sashimi Tuna

When tuna are landed they are graded to identify those fish suitable for serving as sashimi. A sample is taken from the core of the fish, the colour determines whether the fish can be sold as sashimi grade (suitable for consuming raw) or a non-sashimi grade (must be cooked before consumption). This is produced and stored in line with current legislation.
